

Microsoft Doesn't Want You To Know How To Fix Your Xbox 360 Red Ring of Death Right Now!

*What's Causing The Xbox 360 Red Ring of Death?
"The cause of the error has been pin pointed to the Xbox 360's motherboard and GPU. When the 360s motherboard gets really hot, it bends causing it to lose contact with the GPU. Once this happens, the Red Ring of Death starts blinking and it's GAME OVER!"*

- What's Microsoft Doing About The Red Ring of Death?

Absolutely Nothing! Microsoft refuses to fix our Xbox 360 for free, even with the extended warranty you still have

pay money to them, about \$140 and wait 3-4 weeks!

If you want to get your 360 back into action you have only 2 options:

- ▶ **1. Get it fixed by Microsoft** - *This route takes way to long and in the end all you get is a refurbished one with the same problem, Trust me you do not want to go this route!*
- ▶ **2. Fix it Yourself** - *In less than 60 minutes and be back to the game you like to play*

Option #1: This option is so bad, the first time (and it was the last) that I send my Xbox to Microsoft it cost me \$165 and it took it 4 fucking long week to get back, and 6 weeks after that the problem came back.

That sucked! I was out \$140.00 plus \$25.00 shipping

Option #2: FIX IT YOURSELF! After the second time my Xbox 360 decided to show me the ring of death I looked for another way to fix it.... Like you, I hopped used Google to see if I can find a fix that would get rid of the Red Ring of Death and won't cost me \$165 #!@\$#@%

I needed a fix that will allow me to play again that same day and not after 4 weeks....

What I Found...

There are so many products out there on this topic of fixing your Xbox, but most of them really suck! I've bought so many of them (13 to be precise) but most of them are so not clear and understandable and I spent hours trying to fix my Xbox with them without any luck, but 3 of them were really good, but only one was #1.
